
WinFiler Plus 2004 Quarter 4 Update

Updates Include:

2005-01-14

- New Jersey, Ohio, and Pennsylvania forms:
 - corrects the computation of "weeks" for printing SUI Wages when some of the employees do not have SUI Wages.
- Magnetic Media:
 - greatly enhances the speed of displaying Payers on the State Magnetic Media screen.
- 3rd Party Import:
 - corrects an error that occurs if there is no Payer State (code 322) for a Payer.
- 3rd Party Import:
 - corrects an error that imports a previous return's dollar amount into the following return that has no such field.
Error Example:
Return 1 in the file has a dollar amount field (e.g. 10314 representing state wages) with a value of \$100.00.
Return 2 has no field 10314.
The error is that Return 2 will import \$100.00 into state wages instead of zero.
- Federal 943 line 7:
 - corrects a 1 cent rounding error.
- Federal 940EZ Line 6:
 - corrects a 1-cent rounding error.
- W-2 Universal form:
 - corrects an issue with some printers and envelopes where non-address data is showing through the envelope window.

- Federal Magnetic Media:
 - corrects the W-2G "Type of Wager" field was not filling properly when preparing the magnetic media.

- Alignment Settings:
 - corrects the retention of Alignment Settings for 1096 and W-3 Preprinted forms.

- State Magnetic Media:
 - speeds-up the process that filters the Payers.
